

Position Information

Job Number: J1024-0953
Job Title: Regional Inspector
Division: Operations Inspection Division
Location: Mississauga Site Office
Job Type: Indeterminate
Salary Range: \$75,904 to \$105,392
Classification: REG5
Language Requirements: English essential
Unionized: Yes
Number of positions: 1
Position Number: 5412-12
Security Clearance: Reliability
Medical Evaluations: Yes
Nuclear Energy Worker: Yes

What You Need to Note:

The work location for this position is in the Greater Toronto Area (GTA). Physical onsite presence at the Mississauga Site Office and the GTA will be required. Applicants should live within a 60-minute commute to the Mississauga Regional Office.

Regional Inspectors perform 80-100 inspections per year in various provinces and territories throughout Canada. They also respond to events and inquiries involving members of the public. An inspector's time is split between desk work, travelling, and conducting inspections at a wide variety of licensee locations and facilities. Inspectors have freedom and autonomy to schedule inspections and plan work; however, an average of eight to ten (8-10) weeks of overnight travel can be expected throughout the year. On average this means being away from home one week per month.

This position is best suited for individuals who like to be away from their desk, enjoy the challenge of working in varying and sometimes unpredictable environments and who enjoy traveling throughout the GTA and beyond.

Who can apply? Persons legally eligible to work in Canada.

If you have previously applied for this position within the past 15 months and were unsuccessful, you do not need to re-apply.

The CNSC is committed to creating a respectful, diverse and inclusive workplace. We welcome all qualified candidates to apply. If you have a special need that requires accommodation at any time during the recruitment process, please let us know. All information pertaining to accommodation requests will be kept confidential.

The results of this process will be used to staff future positions with similar qualifications and various tenures including term, acting, assignment and indeterminate.

Be an informed applicant. Read ["How to apply"](#).

Closing Date: January 3, 2025, 11:59pm(EST)

Why work here?

At the CNSC, we work hard to create an environment where employees feel supported and heard, by management and their peers alike.

We also provide benefits like:

- Minimum 15 days of annual leave per year
- Competitive salary and benefit package
- Career growth path to become a senior inspector (REG6) in the Operations Inspection Division in accordance with our Regional Inspector Career Progression Program
- Strong support for employee wellness and mental health

The CNSC is also committed to ensuring our workforce is representative and reflective of Canadian society. We strive to be a safe and healthy workplace – one that is inclusive and free from harassment and discrimination. We encourage members of any designated group to self-identify.

Who you are

As an Inspector, the decisions you make directly impact the health and safety of Canadians, and you never lose sight of this responsibility. You are engaged, enthusiastic, and curious! Respect is a big part of everything you do, and it helps you communicate effectively with people inside and outside of the CNSC. Maybe you are not a mind reader, but you are adept at analyzing situations and reading people. You also love variety – one day you may be working as part of a team to address a challenging file and the next day working independently on an inspection.

Ideal candidates will have demonstratable and proven success in at least one of these areas:

1. the use of nuclear substances, instrumentation, and application of radiation protection principles.
2. performing audits against established technical standards, health, and safety and/or quality assurance criteria.
3. conducting compliance inspections in a regulatory environment (federal or provincial agencies).

Please note: Radiation protection training may be provided by the CNSC to the successful candidate who meets the required knowledge and inspection experience.

What you'll do

You will be responsible for compliance oversight in different environments where low and medium risk uses of nuclear substances and radiation devices are used such as; hospitals, labs, construction sites and industrial facilities. Inspections are conducted across Canada at licensee's premises or job sites. You can expect that 50% of your time will be spent preparing for inspections and writing reports, while the other 50% of your time will be carrying out

inspections of licensees or conducting other compliance activities involving members of the public.

Essential qualifications

Education:

- University degree in Science or Engineering or equivalent combination of education, experience, and knowledge.

Language requirements:

- English essential

Experience:

- Planning or participating in the conduct of various types of audits, site inspections and/or verifications in a regulatory regime (provincial or federal) or in the private sector.
- Application of safety, technical or quality assurance principles.
- Working in a high hazard environment (nuclear, chemical, biological).

Knowledge:

- The CNSC's regulatory framework pertaining to nuclear substances and radiation devices and its powers related to inspections.
- Radiation substances and devices used in medical, industrial, commercial, and academic setting applications, including good safety procedures and practices.
- Inspection practices and procedures, including principles of auditing, conducting self-assessments, and verifying compliance with requirements.
- Application of risk information to determine safety significance of inspection findings.

Ability:

- Communicate effectively orally and in writing.
- Prioritize and manage multiple time sensitive tasks to deliver work by assigned deadlines.

Key Competencies

The following “Key Behavioural Competencies” define the behaviours expected of all CNSC employees. These competencies serve as the basis for the selection, performance management, development, and recognition of CNSC employees and will form part of the evaluation of this process.

- Live it - Model the CNSC values
- Own it - Be Accountable & Achieve Results
- Build it - Collaborate Effectively with Others
- Learn it - Commit to your Professional Growth & Personal Leadership

For more information on CNSC's Key Behavioural Competencies consult this [link](#):

Asset qualifications

- Experience in reviewing work instructions or SOPs (Standard Operating Procedures).
- Knowledge of safe work planning and job hazard analysis principles.
- Knowledge of radiation instrumentation properties and applications.
- Implementing, adhering to, or maintaining of radiation protection measures or programs.

Operational Needs

- All CNSC staff are subject to the Mobility Directive.
- This position requires frequent travel, both within the GTA and around Ontario and to other provinces and territories, including periodic multi-day, overnight trips.
- Requires a valid driver's license.

Submitting an Application

Submit the following by the closing date, for our initial screening of candidates.

1. **We want to read your resume!** Please include your contact information so we can reach you.
2. **We want to hear from you!** Please submit a two-page cover letter clearly demonstrating how you meet the essential qualifications for this position and when and how you acquired them.

We thank all those who apply. We will contact only those whose qualifications are the most relevant.
